Hakizimana Bahati

✉ bhakizimana473@gmail.com   ☎ +250785461866   🏠 Kigali/ Rwanda

Experienced full-stack developer with a proven track record of developing and deploying web applications. Skilled in both front-end and back-end development, with expertise in technologies such as Laravel, React.js, Vue.js, Golang and more. Experienced in developing payment systems, ecommerce platforms, car rental applications, and other projects.

Experience

Mid-senior Reactjs, Laravel full-stack developer
2022- present

Empower Africa Now Ltd

- Developed and deployed multiple projects, including payment systems, ecommerce platforms, car rental applications, and others.
- Collaborated with cross-functional teams to design and implement new features and functionality.
- Ensured the scalability, security, and performance of web applications.
- Conducted code reviews and implemented best practices to maintain code quality.
- Provided technical guidance and support to junior developers.

Reactjs fronend developer
2021 - 2022

Quarks Group

During my work at Quarks Group I plays a crucial role in building responsive, user-friendly web applications and ensuring that they meet the highest standards of quality and performance.

- Building and implementing user interfaces for web applications using React.js and related technologies.
- Creating reusable UI components that can be used across different parts of the application.
- Managing application state using tools like React's built-in state management or libraries like Redux.
- Fetching data from APIs and integrating it into the application using asynchronous programming techniques.
- Writing unit tests for React components to ensure they work as expected and are bug-free.
- Optimizing the performance of React applications by identifying and resolving performance bottlenecks.
- Ensuring that the application is accessible to users with disabilities by following accessibility best practices.
- Participating in code reviews to maintain code quality and ensure best practices are followed.
- Collaborating with designers, back-end developers, and other team members to deliver high-quality software solutions.
- Documenting code and processes to ensure that other team members can understand and maintain the application.
- Keeping up to date with the latest trends and best practices in front-end development, particularly in the React.js ecosystem.

React.js, Golang frontend intern Ishema Hub Ltd
Jan 2020 - Jan 2021

As an intern at Ishema Hub Ltd working with React.js and Golang, my responsibilities and tasks was:

- Developing user interfaces for web applications using React.js.
- Implementing new features and functionalities based on project requirements.
- Ensuring the responsiveness and performance of the application's front end.

- Writing server-side logic and APIs using the Go programming language.
- Integrating front-end components with back-end services.
- Managing data storage and retrieval using databases or other storage solutions.
- Collaborating with other team members, including designers and developers, to deliver project milestones.
- Communicating progress, challenges, and solutions to team members and supervisors
- Following best practices in software development, including version control, coding standards, and security practices.
-
- Identifying and resolving technical issues and bugs in the application.
- Implementing solutions to improve the performance and usability of the application.
- Contributing ideas and solutions to improve project outcomes

Education

● **Adventist University Of Central Africa**   **2021-2024**

Bachelor of Information Technology, Majoring in Networks and Communication Systems

- Relevant Coursework: Includes extensive study in computer networking, programming languages Java. and web technologies, preparing for a career in IT support and development.
- Certifications: Cybersecurity assentials, Linux assentials, Network assentials.

Skills

- **Front-End:** React.js, Vue.js, JavaScript, HTML, CSS, Tailwind CSS
- **Back-End:** Laravel, PHP, MySQL, PostgreSQL, mongoDB RESTful APIs, Golang, Java Programing, JavaScript, Postman
- computer-skills: Ms-Office, computer maintenance,
- Networking: Linux, computer-network, Routing and Switching
- Github, fly.io

Certificate

- Cybersecurity essential
- NDG-Linux essential
- Network essential
